PETER HENKEL, Proprietor.
MAIN ST., OPPOSITE POSTOFFICE.

Here and There

Admiral Earl Jellicoe, hero of the battle of Jutland, will open the Toronto Exhibition next August. He will be a passenger on the "Duchess of York."

More newsprint paper is made in Canada than in any other country. In 1930 Canada manufactured 3,504,000 tons or 36 per cent of the world production of newsprint paper.

Thirty-eight lakes in the district of The Pas are being commercially fished today as against 18 two years ago. The catch was 2,175,000 pounds of fish in 1930 as compared with 1,400,000 lbs. in 1928.

Sixteen countries have so far accepted the invitation of the Canadian Government to send official representatives to the World's Grain Exhibition and Conference to be held at Regina, July 25 to August 6, 1932.

Foxes on the ranches in Prince Edward Island are getting Vitamine D in their diet, through the medium of fish. Twice a week sun-dried herring are fed to the foxes on the ranches. The animals are thriving on this new diet.

Rand, Yoho and Kootenay national parks in the Rockies are available to motorists in a continuous loop route at the cost of a $2 license fee. This opens up 400 miles of fine travelling in unrivalled scenery with a total park area of 3,679 square miles.

A Calgary man has won the cheque for $500 offered for the best slogan in the contest just closed by the management of the World's Grain Exhibition and Conference to be held at Regina, July 25—August 6, 1932. The slogan was: "Show what you grow and share what you know."

The English Association Football team, representing many of the best Soccer teams in the Old Country, which will tour Canada, playing games in the major cities of the Dominion during the next two months, arrived at Montreal on board the Duchess of Atholl May 23.

Radio continues to grow in popularity in Canada. Licensed receiving sets at the end of last March totalled 514,701, an increase of 90,555 over the number registered the previous year. Fixures for the year to March 31, 1931 represent a set for every 19 of the population.

Included in the brilliant passenger list that will feature the maiden voyage of the Empress of Britain, 42,500-ton flagship of the Canadian Pacific Atlantic fleet, at the end of May, will be Lord Rothermere, great English publicist and owner of a string of British newspapers, including the London Daily Mail.

Representative French railway experts touring this country and the United States recently made a thorough inspection of Canadian Pacific transportation facilities, steamships, hotels and terminals, gathering a considerable body of information with a view to renewal of material and equipment on the Chemin de Fer du Nord, in France.

Empire Day, held this year on a Monday, made a long week-end holiday. In every part of the Dominion, holiday-makers took advantage of the new low week-end fares, recently inaugurated by the Canadian Pacific Railway, charging fare and a quarter for return trips to any point in the country. This reduction is in force every where in Canada every week-end. (739)

Willie—Becker.

In Edmonton, Wednesday, May 27th, Mrs Ida Willie, of Inga district, became the bride of Mr Albert Becker, of Fort Saskatchewan. The same evening a reception in their honor was held at the home of Mr and Mrs Edwin Hoffman, Rosentnal district, when the newly married couple were the recipients of humerous presents from their many faiends.

Mr and Mrs Becker left on Thursday for their home on the former's farm, 7 miles east of Fort Sask'n.

Senior Baseball.

The Senior ball team played at Fort Saskatchewan, Friday last, and won the game 8—4.

The Seniors' return game with the Forters took place Sunday afternoon, on the local diamond, before a good crowd of rooters. Score: Stony 9 runs, Forters 8. The feature of the game was Rosnau's very necessary home run, at the close of the game, which brought home the man on first; and gave the winning run to Stony. The next game between these teams will be looked forward to with interest.

Safety Week.

This, the first week in June is Safety Week in Edmonton.

The Alberta Motor Assc'n is co-operating with the automobile and garage men of the City in organising facilities for testing motor cars for defective brakes, lights, steering gear, etc.

The A. M. A. invites car owners in every town and district surrounding Edmonton to take advantage of this opportunity.

There will be no charge of any kind for these tests.

What Is a Farm?

A farm, according to the Census Bureau, is all the land FARMED by one person, whether it is one acre or 3,000 acres.

Sound simple, doesn't it? Well, it wasn't so simple for the Government officials to decide what should be considered a farm by the enumerators during the census to be taken this month. Much study and years of practical experience were necessary before the short, concise definition was agreed on.

The amount of farm land owned by one person has nothing to do with the definition of a farm, so far as the Census is concerned. The question is, not how much land does he own, but how much does he operate or farm. A man who owns 300 acres might farm half of it himself and rent the other half out to 3 tenants—50 acres to each. This would be entered on the census records as 4 farms, because the land farmed by each man is considered as a unit.

Canada's Railway Milestones

Fifty years ago, on May 2, 1881, to be exact, the first sod for the construction of the Canadian Pacific Railway was turned, thus commencing one of the great engineering undertakings in the world's history and marking the beginning of the world's greatest transportation system. Enthusiasm for and confidence in this great work was mingled with grave doubts and misgivings, and especially in financial circles in the old world were grey heads shaken in doubt over the wisdom of a young country of small population and no accumulated wealth embarking on such a gigantic enterprise.

The contract for the building of the C.P.R. called for the completion of the project in ten years. It is a matter of history that the last spike of the original main line was driven on November 7, 1885. In other words, construction was completed in four and a half years, and on June 28, 1886, the first C.P.R. train to the Pacific coast left Montreal, arriving at Port Moodie, B.C., five and one-half days later.

The building of the C.P.R. was in fact the building of Canada. Without it Confederation could not have been achieved nor continued. It is the steel link which bound all of British North America together. The successful carrying through of this huge undertaking not only gave the people of Canada courage, but it established confidence in the new Dominion throughout the world. It was a visible object lesson, an ever present encouragement to the Canadian people in dark days and in undertaking other great enterprises.

With the completion of the C.P.R. possibly many people of that day thought that Canada's transportation problems were solved. Yet within fifteen years of the driving of that last C.P.R. main line spike, Messrs. Mackenzie and Mann were engaged in building a second transcontinental railway across Canada, and within the brief space of another ten years a third transcontinental was under construction from the Atlantic to the Pacific.

Looking back over the years, and in the light of experience, Canada probably overdid the building of transcontinental main lines, but at the time these works appeared to be necessary and essential to the national well-being and development. Possibly, too, had the Great War not plunged the world into confusion and years of wholesale destruction, the story of Canada's railways would be different. However, to speculate on this is idle. The fact remains that, with that same courage which promoted and successfully carried through the C.P.R., the people of Canada faced and grappled with the problem which confronted them when war broke and the Canadian Northern, Grand Trunk Pacific, National Transcontinental and the old Grand Trunk were plunged into financial difficulties.

Turning back another page in history, we find that it was only eleven years ago, May 26, 1920, that responsibility for the operation of the Grand Trunk passed to the Government of Canada. Thus several main line systems and a conglomeration of badly co-ordinated branch lines, with a top-heavy financial structure, were left on the hands of the Government. Within a decade these have been amalgamated into a mighty and highly efficient transportation machine, with the largest mileage of any railway under one management in the world. An operating deficit of $32,000,000 in 1920 was transformed into an operating surplus of $20,884,000 in 1930, and this wonderful achievement is but symptomatic of improvements and advances made in every department of service, until today the Canadian National Railways are a source of pride to every Canadian.

In a previous article it was stated that the people of Canada are an impatient people; that they demand results almost over night; that they insist on having all those services and conveniences which the people of other lands have devoted centuries to creating and developing. And it is true, but possibly what Canadians have accomplished in the life of one or two generations is responsible for this national trait; perhaps their accomplishments are the result of this impatience. Nevertheless, such a national characteristic has its dangers. With all the advantages of our great transportation systems, we are of necessity paying heavily for past mistakes, —mistakes attributable to our impatience.

And the real danger lies in the fact that we do not appear to have learned the lesson, costly as it has been. We are still vehemently demanding other things which, in our own best interests, it would be wise to defer for a time until we get our feet a bit more solidly on the ground, and secure for ourselves a stronger position where we can the better stand the strain which these additional and admittedly desirable things will impose upon us as a people.

New Style Typewriter

Coin-in-the-slot typewriters are the latest machines for use of the public in Germany. One thousand letters or spaces are available upon insertion of a small coin. Should the matter to be typed exceed this length, it is only necessary to insert another coin.

Studying Bird Life In North

J. B. Semple, ornithologist of the Carnegie Museum, at Pittsburgh, Pa., has left with two assistants on an expedition which will take them to James Bay and Hudson Bay where they will study sub-Arctic bird life. They will be gone three or four months.

Palpitation Of The Heart
Nerves Were All Gone

Miss Rose Griffin, Ashern, Man., writes: — "About five years ago I was troubled with palpitation of the heart, caused by a shock, and my nerves were all gone, and I could not sleep. I read about Milburn's Heart and Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and wish all others who suffered as I did would give them a trial."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Calgary Exhibition

Poultry Association Endeavoring To Have An Interesting Exhibit

Entry forms to prospective exhibitors in the poultry classes at the Calgary Exhibition and Stampede, to be held July 6 to 11, are being sent out by the exhibition board. Entries close on June 20. A covering letter from Dr. D. S. Macnab, president of the Calgary Poultry Association, urged that some entries be made by all breeders, even though only one or two birds. "Shows and exhibitions are necessary if we are to continue to breed birds true to type," he says. "The value of the opportunity of placing your birds alongside those of other breeders of the variety and comparing them far outweighs the value of any money prizes you may be awarded—welcome as those undoubtedly are."

Recipes For This Week

(By Betty Barclay)

SPECIAL BREAD PUDDING

2 cups milk, scalded.
2 tablespoons butter.
1 cup stale bread, cut into ½ inch cubes.
⅓ cup sugar.
¼ teaspoon salt.
¼ teaspoon vanilla.
½ teaspoon almond extract.
2 eggs, slightly beaten.
1 cup coconut, toasted.

Combine milk with butter and bread cubes. Add salt, sugar and flavoring to eggs and beat slightly. Pour milk mixture over egg mixture and pour in coconut. Pour into greased baking dish, place in pan of hot water, and bake in moderate oven (350 degrees Fahrenheit) to 45 to 50 minutes. Serves 6.

BUTTERSCOTCH COOKIES

3½ cups special cake flour, sifted.
½ tablespoon soda.
½ tablespoon cream of tartar.
½ cup butter or other shortening.
2 cups sifted brown sugar.
2 eggs, well beaten.
½ tablespoon vanilla.

Sift flour once, measure, add soda and cream of tartar, and sift again. Cream butter, add sugar gradually, and cream together thoroughly. Add eggs and beat well. Add vanilla and flour, mixing well. Shape into round or square loaf, wrap in waxed paper, and chill over night. Remove paper; cut in thin slices. Bake in hot oven (425 degrees Fahrenheit) 8 minutes. Cookies may be sprinkled with chopped nuts before baking. Makes 8 dozen cookies.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

Watch Screws For Machines

Smallest Made and 482,000 Required To Weigh a Pound

Watch screws are the smallest made for use in machines. Some of these tiny screws are only one thirty-four-thousandth of an inch in length, the diameter of the head being one twelve-thousandth of an inch. Such a screw has 360 threads to the inch and 482,000 of them are required to make a pound.

Persian Balm quickly relieves chapping, windburn, and all roughness caused by weather conditions. Keeps the complexion clear and lovely. Completely absorbed by gentle rubbing. Never leaves undesirable stickiness. Stimulates the skin. Makes it soft, smooth and flawless. Preserves and enhances natural beauty. Soothes, refreshes and invigorates. Makes hands soft and flawlessly white. Imparts that subtle charm so essential to true elegance.

Taken Off Free List

No more free matches are to be supplied in smoking-rooms and the refreshment counters of the British House of Commons. About 12,000 boxes of free matches are passed out at each session of the House.

The Russian workman, forced to quit a job he likes and work where the bosses need him, must rejoice in the fact that he is no longer slave of a Czar.

Japanese Going Into Poultry

Five Thousand Eggs From B.C. Shipped To Japan In One Week

Five thousand British Columbia eggs were shipped in one week to Japan. Japanese experts visited British Columbia poultry farms and selected, almost to an egg, the hatching stock they required. Then they went to the Record of Performance officials, Winch Building, Vancouver, and placed large orders. These eggs sold at prices ranging from $5 for each egg to $10, $20 and $30 a dozen. T. J. Smith of the R.O.P. organization, Vancouver, says that the Japanese, formerly buyers of B.C. hens and cockerels, are now getting well into the poultry business and are learning scientific hatchery management. "They are using British Columbia stock for the foundation of their poultry industry," Mr. Smith said.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so surely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer, but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Valuable Tablets Found

Throw New Light On Religion At Time Of Abraham

Religious sculptures nearly 4,000 years old have been brought to London, England, by C. Leonard Woolley, who just returned from Ur of the Chaldees. There are important inscriptions and tablets which throw new light on the history and religion of people who lived at the time of Abraham, about 2000 B.C.

"They represent the worship of God by the common people," he said. "We found them in little chapels built along the public streets of Ur."

Balsa wood is so buoyant that it can support almost ten times its weight.

Crime In United States

Statistics Show Homicides Doubled In Past 30 Years

Statisticians have completed their annual study of homicide in the United States, and have produced figures that should appall proportionately with the effect of the compilation of a year ago. These researchers have collected data from thirty-one cities with a collective population of twenty-five million people.

In a generation — thirty years — the average homicide rate for these thirty-one cities has doubled. And in one year the rate has gone up from 8.5 to the hundred thousand population in 1929, to 10.9 in 1930.

There were seventeen times as many homicides to the 100,000 as in England and Wales.

Then the statisticians add one significant statement; The number of convictions in murder cases in the United States is decreasing steadily. The number of murders is rapidly increasing throughout the country. — Minneapolis journal.

Service For Theatre Patrons

Delivery of theatre tickets by motorcycle messengers to any address within 12 miles of the West End, has been started by the Whitehall Theatre in London, England. All playgoers have to do is to telephone the theatre and order the seats. Payment is made on delivery of the tickets, no delivery charge being added.

Interesting Information About Galaxy Of The Milky Way Given By Eminent Astronomer

How science has discovered the vast size of the watch-shaped system of stars called the "Milky Way" was described by J. S. Plaskett, F.R.S., director of the Dominion astrophysical observatory at Victoria, B.C.

The diameter of the "Milky Way" is now estimated at 50,000 light years, the veteran astronomer told his audience of scientists and literary men, gathered at Toronto for the 50th annual meeting of the Royal Society of Canada. "The light year," Dr. Plaskett explained, "is the astronomer's yardstick, the distance light moving at 186,000 miles per second would travel in a year, or six million million miles."

Many are 5,000,000 light years apart, said Dr. Plaskett, and a gap of 1,000,000 light years separated the sun from the nearest star, thus showing the infinitesimal chance of collision.

That the galaxy of the "Milky Way" is a great disc of stars and star clouds, some 200,000 light years in diameter but only 10,000 in thickness was asserted in 1918 by Harlow Shapley, now director of the Harvard Observatory. The sun is not at the centre of this gigantic system, said Dr. Plaskett, but only the centre of an insignificant star cloud, known to inhabitants of the earth as "the local cluster." Recently scientists have developed a theory that the whole galactic system is rotating in its own plane, like a spinning disc, the centre of rotation being about where the "Milky Way" clouds are thickest.

It was difficult to prove that the whole galatic system is in motion remarked Dr. Plaskett, for if it turned as a whole there would be nothing to compare it with and no movement could be detected. But it has been discovered by the observatory at Victoria, that the most distant stars move more slowly than those near the centre of the system, just as the outer planets of the solar system move more slowly than the inner planets. "The motions of these stars," he asserted, "agree so exactly with those that would be given a rotation of the galaxy that there can be no reasonable doubt of its presence."

This rotation, stated Dr. Plaskett, caused the sun and neighboring stars to move about the distant centre of the galaxy at a speed of nearly 200 miles per second, or 2,000 times faster than the 350 miles per hour record in the Schneider Cup races—the fastest man has ever been able to move over the surface of the earth. "So vast is the galaxy," he continued, "that it will take the sun some 250,000,000 years to make one revolution; in the whole space of geological time on the earth we have travelled around the centre only five or six times.

"Our conviction of the reality of this rotation," he concluded, "is much increased when we learn that the direction to and the distance from the centre of the galaxy which can be calculated from the motions of the stars observed at Victoria, are almost exactly the same as those earlier obtained from the distances of the stars and the dimensions of the galaxy.

The speaker, who attracted many of the public to hear his address, is a Canadian savant, well known to the astronomical fraternity throughout the world. At Victoria, he is in charge of the world's second largest telescope. Dr. Plaskett was recently awarded the gold medal of the Royal Astronomical Society of London, England, "for his valuable observations on stellar velocities, and the important conclusions derived from them." He was also the recipient of the Rumford premium for research in the temperature of the stars. This medal, awarded by the American Academy of Arts and Sciences, is the highest honor the academy can bestow upon a distinguished scientist.

"Have you permission to move things out of the nursery?"

"No. I was afraid to ask for fear I might be refused!"—Sondagsmisse-Strix, Stockholm.

Production Of Raw Furs

Fur Industry Last Year Contributed Over Twelve Million To Wealth Of Canada

Canada's production of raw furs in the twelve months ended June 30 1930, had a total value of $12,208,547 These totals represent the values of pelts of animals taken by trappers and those from fur farms, the value of the latter constituting approximateely 19 per cent of the total in the season 1929-30.

For the first time in the history of the fur trade the silver fox leads all other kinds of raw furs in value of production, with a total in 1929-30 of $2,716,264, nearly the whole of this amount being contributed by the fox farms. Next in order of importance is the muskrat with a total of $1,-781,651, followed by the white fox with $1,238,917, the beaver with $1,-025,033, and the mink with $1,010,-198. These are the only kinds of furs with values of production in the period under review exceeding a million dollars.

As in former years, Ontario occupies first place among the provinces according to value of raw fur production, the total for this province amounting to $2,931,774, or 24 per cent. of the total value for Canada. Quebec, the Northwest Territorips, Saskatchewan and Alberta follow next in the order named, each with a product valued at over a million dollars.

Advice For Bee-Keepers

Colonies Should Be Examined Frequently If Weather Is Unfavorable

The spring of the year is a critical time for the apiarist. Unless the weather is suitable for the opening of flowers the bees may suffer for want fo food, which is necessary for the strengthening of the colonies for their summer's work. According to the Federal Department of Agriculture the colonies should be examined weekly, weather permitting, or fortnightly if the weather has been cool during the spring. This examination is necessary to determine that the broodnest is expanding properly, and to see that the bees are gradually consuming the stores and replacing them with brood. It is important that the bees have a reserve store of a few pounds to carry them over a period of unfavorable weather and a shortage of nectar. Explicit instructions for the handling of the apiary at this or at other seasons of the year are contained in Bulletin No. 33 of the Department of Agriculture.

Alberta Cattle Clubs

Formed Under the New Federal Livestock Policy

"Cattle clubs formed under the new federal livestock policy by which three pure-bred bulls are loaned for six years, with changes made every two years for each three clubs of a breeding centre, have made good progress in Alberta," says the Edmonton Journal. "To date there are 63 bulls scattered all over the province. Each centre selects one breed and while the majority of clubs to date secured beef and general purpose breeds, a number of clubs have requested dairy bulls of the Ayrshire, Holstein and Jersey breeds, also Red Polled. Most of the bulls already placed have been Shorthorn with 40 per cent. Angus Herefords and other breeds."

Central Steam Heating

A thousand men will soon start work on a $1,500,000 addition to one of Winnipeg's residential central steam heating systems, says the Western Canada News Bulletin.

Volcanic Ash In Calgary

Find Four-Inch Volcanic Ash Bed Within City Limits

The discovery of a four-inch volcanic ash bed within the city of Calgary, Alberta, was announced recently by Dr. J. A. Allan, professor of geology at the University of Alberta. Speaking at a meeting of the Royal Society of Canada, at Toronto, the geologist surpised his colleagues by delivering an unexpected account of volcanic activity in Alberta, the surface of which has been heretofore considered purely cretaceous or chalky.

Dr. Allan said the Calgary ash bed, discovered by him four weeks ago is without impurities, as though it had just been dropped by the wind from a distant volcano. It extends for one-half mile and is about to be hidden by the construction of a reservoir. In his opinion it dates from the pleistocene period. "Where did it come from," he asked, declining to offer his own explanation.

Other geologists working in Alberta have located traces of volcanic activity, said Dr. Allan. In 1924 L. O. G. Sanderson found a series of at least 20 impure ash beds hidden in grey sandstone near Edmonton. A 16-inch ash bed is known to exist 250 feet below a coal bed in the Belly River district.

Ship Wheat To New Port

Shipment Is Made Of 100,000 Bushels To Port In Algeria

For many years Canadian-grown wheat has been shipped to ports on the seven seas, but recently a shipment of 100,000 bushels of wheat was put aboard the S.S. Brandon at Montreal, consigned to Mostaganam, Algeria, a port which has never before figured in the clearance forms of vessels leaving Montreal. The harbour at Mostaganam cannot accommodate vessels of the "Brandon's" draught, so that unloading of the bulk cargo will be made into lighters off that port. The "Brandon" also carried wheat for Marseilles, France, and Trapani, Sicily.

Last year Canada shipped 189,190,-670 bushels of wheat to 23 countries, and 42,701,289 barrels of wheat flour to 53 countries. Most of the wheat went to the British Isles, which took 131,501,283 bushels. China was Canada's best customer for flour with 2,854,512 barrels, with Britain a close second with 2,813,248 barrels.

An expert on earthquakes declares that people in houses feel exaggerated effects of an earthquake, whereas people in automobiles get a minimum shock.

Plan Which Would Fix A Standard Coin For The Empire Is Furnished By Vancouver Man

Wage War On Insect Pests

Damage To Crops In One Year In Canada Estimated At $125,000,000

Entomologists of the Canadian Government Department of Agriculture, have again organized their war machinery and started it in action against insect pests throughout the country. These pests, notwithstanding the organized scientific offensive against them, do over $125,000,000 damage in one year, and the total damage to trees, shrubs, plants and crops, if the entomologists did not wage relentless war during the growing season would amount to hundreds of millions of dollars.

This year intensive campaigns are to be conducted against grasshoppers, wireworms, the wheat stem sawfly, the pale western cutworm and his ally the red-backed cutworm, the Colorado potato beetle, the imported cabbage butterfly, the root maggot and several other destructive members of the insect tribe. A special organization is employed to attack the pest which unless checked, would destroy forests.

For several years the entomologists have claimed decisive victories over their enemies and this year they expect to score a rout. The battle is now on in earnest and will continue in intensity until the autumn. The casualty list will total countless millions and the country will be saved, many times the cost of the campaign.

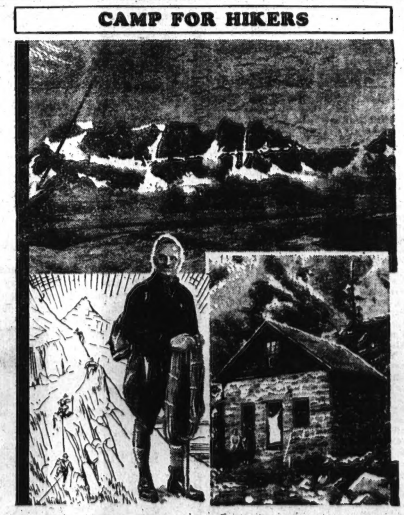
Should Receive Medal

New York Hotel Has Installed Elevator For Dogs

If the Society for the Prevention of Cruelty to Animals has a medal or a prize, or even an honorable mention for the best suggestion for humanitarian treatment of animals, that medal, prize or honorable mention should go this year to the Hotel Croydon in New York City, which has established private elevator service for masters and their dogs. Dog lovers, dog-haters and neutral parties will welcome a device which eliminates the danger of small paws being stepped on in crowded elevators—and of small teeth being wielded in anguished protest.

After experimenting for five years, an Omaha physician has bred wingless and almost clawless chickens.

CAMP FOR HIKERS



Alpinists and hiking enthusiasts are to be given a spendid opportunity of investigating the possibilities of the Tonquin Valley, one of the striking scenic areas of Jasper National Park, through the operation from Augst 2 to August 15, of a climbing-hiking camp in this area, under the jurisdiction of Cyril G. Wates, noted Canadian alpinist.

Mr. Wates is a climber of many years'experience in the Canadian Rockies, and has participated in many notable ascents. He will have with him Hans Fuhrer, noted Swiss guide, and the transportation and commissary arrangements for the camp will be in the hands of Jack Hargreaves, of Jasper.

The expedition to the Tonquin Valley will leave Jasper on the morning of August 2nd.

While the vexed question of currency and its effect on international trade depression is to the fore at Ottawa, credit for originating a plan which would fix a standard coin "rex" for the Empire, and even for the world, has been given by Prime Minister Bennett to a Vancouver man, Thomas Shaw Jenson. He has been studying this question for 40 years.

It was in 1903 that Mr. Jenson, then interested in farming near Innisfail, Alberta, met Mr. Bennett, "a young lawyer from Calgary," at a Conservative picnic. Mr. Bennett became interested later in Mr. Jenson's plan for simplifying trade.

The idea, Mr. Jenson explained recently, is to establish a standard unit of 10 grams coin gold, which would be approximately $6 in Canadian money.

This would save "one hour a day" universally in conducting the business of international exchange. The British "rex" would bear the same relation to the Canadian "rex" as the American dollar now bears to the Canadian dollar.

"Different figures for the same prices in different countries obstruct foreign trade," Mr. Jenson explained, "but all could be adjusted to one unit of 10 grams coin gold—that is to the "rex" of $6. Each country could give it a national name and use their old currency names for fractions of it."

One "rex" would equal 100 "centi" in Mr. Jenson's scheme. The Chinese "sun" could be issued as four centi; the Indian silver rupee at six centi; the English crown at 20 centi.

"Exchange in paper, silver or gold currencies would be thus simplified," he added. "All currencies can be adjusted to the international system without breaking the associations."

"When all nations are using the same figures for the same prices (namely, weight of coin gold) instead of different figures, it would save business millions by making the price immediately understandable in exchange. Prices would be exactly understood in all countries. The proposal would not effect the silver standard."

In addition to discussing the question with Hon. R. B. Bennett and Rt. Hon. L. C. M. S. Amery, former secretary of state for the Dominions, Mr. Jenson has talked about it with leading world bankers, and has found general support.

Mr. Jenson was chartered accountant in Calgary for many years before moving to Vancouver.

Sound Proof Boards

Invention Of McGill Professor Is Fraught With Great Possibilities

If the recent discovery of Prof. H. E. Reilly, of the Physics Laboratories, McGill University, Montreal, proves as successful as hoped for, the neighbor's radio, or any other noise, pleasant or raucous, may be shut out, if his sound proof boards are used in the construction of the house, the office, or any other kind of building. These boards made from waste wood products, have, according to a press dispatch, proven successful under several tests. Acoustic or sound proof boards made from sugar cane have hitherto been imported into Canada, but the new Canadian product will be much cheaper. It is said that buildings constructed of Prof. Reilly's invention will be so noiseless that a steel rivetter working next door would be unheard.

"So you got 2,000 shillings compensation from the motorist who ran over you. What have you done with the money?"

"Bought a car!"—Faun, Vienna.

Fond Mother: "You brute! Look what you've done to my child's banana."—The London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

Hoping to settle internal troubles in B.C., the government will ask Peter Veregin to hand over the colony of Crestovia to the Sons of Freedom.

Queen Mary was 64 years old on May 26, and felicitations poured in on her from a wide circle of relatives, friends and admirers.

Hon., Herbert Marler, Canadian minister to Tokyo, in an interview, urges Canadians to go after Oriental trade.

Regulations governing the shipment of cattle from Canada to Great Britain have been amended to permit the carrying of cattle on open decks in the summer months.

Within the next year between 20 and 30 trade treaties are to be revised, according to a statement made in the House of Commons by Hon. H. H. Stevens.

Export trade in Canadian whisky ran into a tremendous slump during April. The figures were $169,000, compared with $2,178,000 for the same month in 1930.

W. G. Duncan, superintendent of the Prince Albert branch of the Soldier Settlement Board for two years, has been transferred to take over the superintendency of the Calgary, Alberta, office.

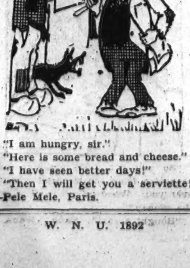
Gold seekers have staked claims in the valleys of Long River and Badger Creek, seven miles northeast of Holmfield, Man. Traces of gold were found in the valleys about 20 years ago and interest has been revived.

Announcement that the British Dental Association will meet in conjunction with the convention of the Canadian Dental Association in Toronto during July, 1932, was made at the 64th annual meeting of the Ontario Dental Association.

Russian civil aviation authorities announce the intended opening on August 1 of one of the longest passenger and mail airlines in the world, extending more than 10,000 kilometres (roughly 6,000 miles), from Moscow to Irkutsk and Vladivostok.

New Uses For Wheat

New uses for surpluses of wheat and other grains are being made the subject of an exhaustive survey by the National Research Council, it is announced. Other studies are being conducted in the hope of developing processes which will turn waste materials into products of commercial value.



"I am hungry, sir."
"Here is some bread and cheese."
"I have seen better days!"
"Then I will get you a serviette!"
—Pele Mele, Paris.

SUNDAY SCHOOL LESSON

JUNE 7

JESUS CRUCIFIED

Golden Text: "He was wounded for our transgressions, He was bruised for our iniquities; the chastisement of our peace was upon Him; and with His stripes we are healed."—Isaiah 53.5.

Lesson: Luke 23.

Devotional Reading: Isaiah 53.7-12.

Explanations and Comments

The Crucifixion, verses 33, 34.—We call the knoll where Jesus was crucified Calvary, from the Latin word "calvaria," a skull. There He was nailed to a cross, and on either side of Him a malefactor was hung to intensify the ignominy of His crucifixion. The four soldiers who crucified Him, after dividing His garments among them (the headdress, the shoes, the outer robe and the girdle was distributed "to every soldier a part," John 19.23, 24), cast lots for the possession of the seamless inner robe. And then they sat and watched Him there (Matthew 27.36), to make sure that He was not rescued. There is a remarkable picture by William Blake, which depicts the three crosses from behind. No form of Christ can be seen. The soldiers are casting the dice for His garments, but they have gone behind the cross to do this. Light emanating from the central cross illuminates the other crosses and the soldiers. Thus the artist has sought to depict the victory of the tragedy.

And sitting down, they watched
Him there,
The soldiers did,
There, while they played with dice,
He made His sacrifice,
And died upon the cross to rid
God's world of sin.
He was a gambler, too, my Christ,
He took His life and threw
It for a world redeemed.
And ere His agony was done.
Before the westering sun went
down,
Crowning that day with Crimson
crown,
He knew that He had won.
—G. A. Studdert Kennedy.

"Father, forgive them; for they know not what they do," were the beautiful words of the Saviour spoken not only for the soldiers who had merely obeyed orders, but seemingly also of the Jews who had brought about His crucifixion but had not realized the enormity of their guilt. His prayer exemplifies the spirit which He had tried to inculcate in His followers when He bade them love their enemies, and do good to them that despitefully used them. Think of the generous heart of the dying Saviour who could actually try to find an excuse—not merely forgive—not merely pray for—but actually try to find something to say in their favor. There was very little that could be said, but He looked for it and said it. Their prejudices, their upbringing, their ignorance about Him. They did not know what they were doing. If they realized it, they would not do it. Father, forgive!"—J. Paterson-Smyth.

The Death, verses 44-46—For three hours there was darkness and the veil of the temple—the curtain between the Holy Place and the Holy of Holies—was torn in two. "The darkened skies were a fit symbol of the blackest crime in all history of man. The rending of the temple veil was a type of the 'new and living way' opened into the presence of God for all believers. Thus these two signs vine aspects of this atoning death, and indicate the heinousness of sin and the purpose of redeeming grace."—Charles R. Erdman.

"Through His life and triumphant death, and through the living energy of the Spirit, we share in the redeeming love which overcomes evil, and find forgiveness, freedom and eternal life."

An authority claims that a goose can live 50 years. Quite a number of humans just begin to realize it at that age.

Advocates Mixed Marriages

Union Of White and Yellow Races To Prevent Race War

Intermixing and marriage between the Japanese and Chinese and white races in British Columbia would not only settle the so-called racial problem, but the resultant race probably would be superior to both the present white and yellow races, in the opinion of Dr. Charles Hill-Tout, noted Vancouver anthropologist, expressed in an interview in Toronto.

In ten generations, if racial and cultural prejudice would be broken down and cross-breeding continued, the characteristics of the new race would be fixed, said Dr. Hill-Tout, who is attending the sessions of the Royal Society of Canada.

Only by intermarriage to the fullest degree could Dr. Hill-Tout see any solution to the possibility of an ultimate race war, with the coloured peoples against the whites. "I think such a conflict is a possibility," he said, "if we don't check up on our air of superiority in dealing with the Asiatic peoples and give India self-government. That seems the only way to me of preventing India from aligning itself with some enemy of Europe.

"All this foolish prejudice of race—just as strong on the part of the Japanese—should be broken down," he continued. Denying emphatically the common belief that a mixture of the races usually retains the vices of both and the virtues of neither, Dr. Hill-Tout said that was simply because, "with our cultural prejudice, the resultant product is forced back into the lower of the two races culturally." It was that way with the half-breeds of Western Canada, he said, who on account of the race pride of the white were forced back to live with the Indians.

Russia Keeps It Up

Country Steadily Forging Ahead To Reach Its Goal

Russia keeps it up. Her wheat crop is past a billion bushels, away ahead of any other country, and she has now reached her five-year goal in oil production in two and a half years. She has displaced Venezuela as the second largest oil-producing country. The United States is easily first. Elsewhere in this matter is published the statement of the British Secretary for War that Russia's expenditure for war preparation has increased 184 per cent. since 1924, and now Russia has ordered 100 tanks from a British firm. Russia's army is steadily becoming more formidable.

Nearly one-fourth of Poland's 1930 steel production went to Soviet Russia.

The ADVENTURES *of* CAPTAIN JIMMY *and his Dog* SCOTTIE

WHAT CAME BEFORE: Captain Jimmy and Scottie become lost in the darkness while flying over the Chinese war zone. On landing, they are captured by Chinese bandits. Captain Jimmy escapes and plans to set free the remainder of his party.

Cautiously I moved toward the camp. The fires had burned to embers and now and then flamed up fitfully. Certainly the outlaws wouldn't be looking for an escaped prisoner prowling around their tents at that hour.

Rolled near the largest of the fires lay the figure of a man. Carefully I crawled nearer. A small twig broke under my knee, and I stopped, motionless not even breathing for a minute or two.

As I wiggled closer I could make out his features. Sure enough, it was poor old Fu Hsu (Foo Soo) the interpreter. He was cramped and so cold and scared, I held up a finger in warning, and worked myself along to a point where I could cut his bonds with a jack knife.

"All asleep?" I whispered.

He nodded. Quietly we crept away toward the cool spring. The fresh, cold water revived him wonderfully. He drank as though he never intended to stop. Then I questioned him.

"What happened to Scottie? the dog. Bow-wow?"

"Blandit hit him on the head—dog he bite blandit. Tie dog to tree. No idee where doggie."

"And the Colonel?" I asked.

"Colonel, he blandit, now. He cook," whispered the interpreter.

"He'll probably make a better bandit than a Colonel."

Meanwhile, a plan had been forming in my mind. Quietly we picked our way to where the Burros were hitched. We tied a dozen of them together so they would lead in a line. The other burros we cut loose, so it would take time for the bandits to catch them and get on our trail.

Taking the halter of the lead burro, I headed down the valley that led through the cleft in the mountains. Fu brought up the rear with two more burros—their lead rope tied around his waist for fear he might drop it! He was the most hopeless Chinese I ever saw.

Loose stones began rolling, and the burros instead of walking on their tip toes, seemed to stamp along on their heels. You know how loud everything sounds when you want to be quiet, and it certainly seemed as if the noise we were making must wake the whole camp.

Finally we came to the narrow defile. Beyond that notch there was a bit of a plateau. It was here that the bandit guard would be.

The bandits had just risen to their feet at the sound of our burros coming through the pass. Plainly they were puzzled. Had we come riding out into them like a whirlwind, they would have understood, and started firing on us. But here was a string of burros peacefully wending their way into the light of their camp fire.

Leaning forward from the neck of my burro, I pricked the last of the string with my jack-knife. With a shrill cry he jumped against the next one ahead, who in turn rushed the next. In a moment they were in headlong flight.

They scattered right and left among the bandits, and when a burro failed to bowl one over, the rope caught his feet and tripped him. Then, in the midst of the uproar, we dashed out yelling. The rout was complete. We just waited long enough to grab a rifle and went on a mad scramble down the mountain side.

Mile after mile we rode at break-neck pace. Far back up the valley the whole bandit camp were in hot pursuit. When my burro showed signs of slackening speed, I thumped him in the ribs and off he went again amid a shower of dust and loose stones.

Rounding a corner we came suddenly to a railroad track, where five or six decrepit old freight cars stood, and a rickety old engine. We could hear the hoofs of the outlaws' burros pounding down the valley as we reached the cars. I leaned over and grabbed Fu by the slack of his pants. As I heaved to pull him in, a dark body came hurtling in, caught me amidships, and over we all went in a pile on the floor.

(To Be Continued.)

Anyone desiring photo of Captain Jimmy, write to Captain Jimmy, 2010 Star Building, Toronto.

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. - - Pound and half pound tins at your grocers

Mooring Mast Cost

The cost of the airship mooring mast at St. Hubert, Que., including land, buildings, equipment and all improvements up to March 31, 1931, was $1,846,569.16, according to a reply given in the House of Commons by Hon. Donald Sutherland, Minister of National Defence. This sum was exclusive of operating charges.

Western Livestock Values

Values of livestock in the Western Provinces are given in the latest estimates are follows:—Manitoba, $53,741,000; Saskatchewan, $112,846,000; Alberta, $94,065,000, and British Columbia, $27,355,000.

Undergo Special Test

Locomotives Of German Railway Examined and Checked Yearly

Once a year the locomotives of a German railway are examined for stability and performance by placing them on a special test stand. Here each engine is operated for many hours as though on an actual run, and careful check is made of its performance. The whirling wheels of the stationary locomotive often revolve to equal an engine speed of eighty miles.

The celebrated leaning tower of Pisa is made entirely of marble.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

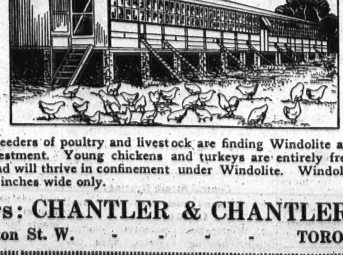
WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE



USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

SOVIET POLICY OF GOVERNMENT MEETS CRITICISM

Ottawa, Ont.—A protest against the action of the Dominion Government in banning imports of coal, pulpwood, furs and other commodities from Russia by order-in-council, was voiced in the House of Commons by Henri Bourassa, Independent member for Labelle. He failed to see where the government had secured a mandate to take such action. If there was to be a protest against conditions in Russia, such protest should have been made by the parliament of Canada.

Mr. Bourassa found some inconsistency in the attitude of the Government toward Russia. Our sense of social order and justice stood "aghast" at the idea of purchasing coal and pulpwood from Russia, but why had the Soviets been invited to attend the London conference of wheat-exporting countries, presided over by Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain. He presented a motion that "the House regards the growing practice of deciding by order-in-council important matters of public policy, as an encroachment upon the duties and privileges of parliament and a violation of the principle of responsible government."

The Russian situation was excellent to use as an example because in the last ten years every step in diplomatic and trade relations between Canada and Russia had been taken by order-in-council, he said.

Mr. Bourassa wondered if private interests were not an influence in the banning of Russian products. Senator Webster, he said, had a monopoly of the sale of Welsh coal in this country, and Sir Herbert Holt, with the International Paper Company, monopolized the pulpwood situation.

If Canada was not going to trade with Russia on religious grounds because that country was atheistic, was this country going to stop trading with the United States where capitalistic and materialistic beliefs ruled?

Minister Of Justice May Go To Britain

To Hold Watching Brief In Appeals Before Privy Council

Ottawa, Ont.—Hon. Hugh Guthrie, Minister of Justice, plans to visit the Old Country this summer, to hold a watching brief, as it were, in several important appeals going before the Privy Council. It is understood that the natural resources appeal is to be heard, also the security frauds act appeal. Mr. Guthrie's visit is conditional upon there being no Imperial Economic Conference here this autumn, and also upon an early conclusion of the session of parliament.

Chinese Want Munitions

Southern Armies Buying Equipment To Fight Nationalist Government Forces

Hong Kong, China.—A contract has been signed between leaders of the southern armies and a firm of munition manufacturers for a million dollars worth of shells, bombs, grenades and rifle ammunition with which to combat Nationalist Government forces. Heavy shipments of arms from Germany and Japan, it was said, have been unloaded at Canton in the last few weeks and the combined Kwangtung and Kwangsi armies have sufficient munitions to hold out for six months.

Wheat Clearances To Europe Are Higher

Over 20,000,000 Bushels Shipped First Three Weeks In May

Fort William, Ont.—The May rush of Canadian wheat to foreign markets swelled the month's total to over the 20 000,000 bushel mark last week, the weekly report of E. A. Ursell, statistician to the Board of Grain Commissioners, shows. Clearances for the week ending May 22 were 5,055,471 bushels, and do not include shipments of Canadian wheat from United States ports. A report of U.S. clearances has not been received.

Rum Ring Probe

Enlargement Of Investigation Is Urged In Senate

Ottawa, Ont.—Enlargement of the Quebec-St. Pierre-Miquelon rum ring probe to include the Maritime provinces was suggested in the Senate by Senator J. J. Hughes. He was informed, he said, the government intended passing an order-in-council within a short time, fixing the powers and scope of the investigation.

Short-circuiting of liquor cargoes from the islands of St. Pierre and Miquelon to isolated spots in Quebec was charged against the rum ring, Senator Hughes declared. The Federal Treasury, he was convinced, had been mulcted out of millions of dollars in excise duties, but he did not believe the activities of the ring were limited to Quebec province.

Faster Freight Service

C.N.R. Carries Short-Haul Package Freight In Baggage Cars

Winnipeg, Man.—Faster and more frequent delivery of package freight to short-haul points along certain lines of the Canadian National is stated by Vice-President A. E. Warren to be the object of an experiment which is now in effect in the Winnipeg region. The experiment is the carrying of less-than-carload lots by baggage car of the regular run of passenger trains. The new service went into effect May 22, between Winnipeg, Belmont, Brandon and Virden, and a similar baggage freight service has been established between Saskatoon and Edmonton by way of North Battleford, and between Calgary and Edmonton, by way of Mirror.

Cattle Shipments To Britain

First Of Several Weekly Shipments From Saskatchewan

Saskatoon, Sask.—One hundred head of Saskatchewan cattle went forward to the British markets recently, 30 of which were taken from a feed lot within half a mile of Saskatoon. This is the first of several weekly shipments that will be made by the Saskatchewan Co-Operative Livestock Producers Limited.

The cattle were taken from the J. H. Langham farm situated one and a half miles out on Avenue "B" North, and were purchased by Mr. Langham under the government feeder scheme.

They were Hereford steers and averaged between 11 and 12 hundred pounds.

Protection Of Copyright

Winnipeg, Man.—Authors who wish complete protection of Canadian copyright for their stories must register them at Ottawa, or indicate in the articles that they are "copyright," according to judgment of Mr. Justice Donovan. Otherwise, if a newspaper had no reasonable grounds for suspecting that "copyright subsisted in the work," it was entitled to publish it.

Meeting For Farm Women

Saskatoon, Sask.—Women members of the farming population of Saskatchewan will gather at Saskatoon during the second week in June. At the farm women's university week, June 9 to 12, subjects of interest and importance to women on the land will be discussed in detail. The attendance is expected to be large.

BACK FROM JAPAN

Hon. Herbert M. Marler, Canadian Minister to Japan, is back on native soil, and arrived at the Canadian capital a few days agn.

Remembrance Day

Bill Passed To Fix Permanently November 11 As the Date

Ottawa, Ont.—After a prolonged discussion, a senate committee passed the bill to fix permanently the celebration of "Remembrance Day" upon November 11. It would separate the observance of "Thanksgiving Day" and "Armistice Day," fixing the latter upon November 11, and leaving the former to be proclaimed upon any day chosen by the Dominion cabinet. The bill will go back to the senate for final consideration.

During the committee discussion, some criticism was made of the plan of having two distinct holidays.

On behalf of the various veterans' associations, J. R. Bowler, general secretary of the Canadian Legion, pressed for separate celebrations of "Thanksgiving Day" and "Remembance Day."

Loss Of Russian Submarine

Craft Goes Down After Explosion With All Hands On Board

London, England.—Russian aeroplanes and warships circled above the spot where Soviet submarine No. 9 of the Baltic fleet sank, Friday, May 22, 1931, in a pool of oil.

Although the Soviet Government remains silent on the tragedy, despatches from Riga, Latvia, said it was understood the craft went down after an explosion presumably with all hands, about 100 miles from Helsingfors, Finland.

Moscow despatches said the submersible failed to rise after making a dive during manoeuvres with other vessels of the fleet.

The number of the crew or the extent of the casualties was unknown.

Russia is believed to maintain a fleet of about eight submarines, 12 destroyers and three battleships in Baltic waters.

Swedish Flier Promoted

Stockholm, Sweden.—Captain Albin Ahrenberg, Swedish flier who participated in the removal of Augustine Courtauld, British meteorologist, from the Greenland ice plateau, has been promoted to the rank of a captain in the navy in recognition of his feat. His direct rise from a non-commissioned officer was considered an unprecedented distinction in Sweden.

Canadians Lose Credit

Contributions To Cultural and Economic Development Frequently Ignored

Ottawa, Ont.—Canadian contributions to the cultural, social and economic development of North America are often ignored, Professor J. Bartlett Brebner, head of the Canadian History Department of Columbia University, New York, told the Canadian Historical Association here.

"Canadian inventors, scientists, artists and professional men have naturally carried their ideas to the largest North American markets, and, once there, no one has been concerned to separate their contributions from the general pattern of living."

Gold Seekers Are Busy

Many Claims Staked Along Sheep Creek At Okotoks, Alberta

Okotoks, Alberta. — Search for placer gold has gripped this oil town during the holiday week-end, and many claims have been staked along Sheep Creek, within a stone's throw of the town boundaries. One report said a fair-sized nugget had been found.

Operations have been carried on by the handful of prospectors at a rapid pace and with the creek being quite shallow much of the bed is being explored.

Whether the search is bringing paying returns has not been ascertained.

Wins Story Contest

Ontario Boy Is Winner Of $5,000 Prize Offered By Chicago Publication

Espanola, Ont.—Albert Leblanc, who lives near here, is the winner of the $5,000 prize story contest of a magazine published in Chicago. This is the second story Mr. Leblanc has sold. The first he wrote three years ago, when he was only 16, for which he was awarded a prize of $1,500.

The young prize-winner is working on road work as a teamster. The prize-winning story, entitled "Lonely Boy," is based on experiences in his own life while a taxi driver in Sudbury for seven months last year.

No Cause For Damage Claim

United States Claims "I'm Alone" Was American-Owned

New York.—A special despatch to the New York Times from Washington says:

"The demand of Canada for damages for the sinking by the coastguard of the rum-running schooner, "I'm Alone," 200 miles off the Louisiana coast on March 22, 1929, will be met by the United States with the contention that the vessel was in reality American-owned and that no no just cause lies for a damage claim.

Would Not Bear Arms

Oakland, California.—In line with a decision of the United States Supreme Court denying citizenship to applicants refusing to take oath to bear arms for the country in time of war, Superior Judge Fred V. Wood postponed granting final papers to Miss Minnie E. Dauphinee, of Oakland. Miss Dauphinee, who came from Canada, said she would nurse during a war but would never take human life.

DAIRY GRANT UP FOR DEBATE IN COMMONS

Ottawa, Ont.—In a brief but somewhat heated discussion of agriculture department estimates, in the House of Commons, low butter prices bulked large. An appropriation of $295,000 for dairying, of which $5,000 is for a grant to the National Dairy Council, furnished the basis for the discussion. Almost at the outset came a motion to cut down the total amount by $5,000. E. J. Young, Liberal member for Weyburn, who moved the reduction, asserted that the council had become an organization to "propagate Tory policies," and that through unfortunate choice in its officers had produced nothing better than recommendations for higher duties on agricultural products.

The grant had been voted for several years, rejoined Hon. Robert Weir, Minister of Agriculture. If he discovered at the end of the present financial year that the National Dairy Council had done nothing to earn it, he would be willing to see it dropped from next year's estimates.

Regret at the decline in butter prices was voiced by Mr. Weir. He spoke of an agreement which he had made with Hon. Parker Moloney, Australian Minister of Markets, that no butter should enter Canada from that country at less than 32 cents a pound "except by mutual agreement" if entry at a lower price would injure Canadian farmers. Subsequently, the minister said, price cutting among Canadian organizations had materially reduced the price until it was thought that "rock bottom" had been reached. He had then released Mr. Moloney from the agreement.

Complaints were voiced by Liberal members that the Conservatives, during the last campaign, had declared that butter prices would rise as soon as Mr. Bennett was returned to power.

If the National Dairy Council did as much for agriculture as it had when he was minister, said Hon. W. R. Motherwell, former minister of agriculture, it would get his support. He asked Mr. Weir if the total figure of $9,929,000 for agricultural estimates included the supplementary estimates of last year. When the minister said it did not, Mr. Motherwell declared the amount to be spent in the coming year was not $400,000 higher, but was actually about $100,000 lower than last year. Mr. Weir agreed that if the supplementary vote were taken into account, that appeared to be correct.

Butter had been a prolific course of discussion during the election, Mr. Motherwell proceeded. The true criterion of the progress of dairying was in milk production. During the 10 years of Liberal government the production of milk had advanced from 10 billion pounds to 14 billion pounds, an increase of 40 per cent.

Twister Wrecks Train

Tornado Lifts Twelve Steel Coaches From Track Near Fargo

Fargo, N.D.—A tornado wrecked the Great Northern's passenger train, "Empire Builder," about eight miles southeast of here, killing one person and injuring a number of others. The twister lifted the train from the tracks.

Twelve steel coaches comprising the train were turned over on their sides. The engine and tender alone remained on the track. The man killed was believed to have been a section worker. He was pitched through a window as the coaches were blown from the rails.

Given Honorary Degree

Toronto, Ont.—A governor-general and two prime ministers were honored by the University of Toronto, when the Earl of Bessborough, Rt. Hon. R. B. Bennett, Prime Minister of Canada, and Hon. George S. Henry, premier of Ontario, received the degree of Doctor of Laws at a special convocation.

Western Boy Joins Navy

Kingston, Ont.—E. C. Mayhew, Moose Jaw, is one of 17 cadets of the Royal Military College who will join the Royal Canadian Navy on June 1, for the summer course, which lasts until August 15.

PRINCIPALS IN BEAUHARNOIS DISCUSSION

When Hon. Robert Gardiner (left), Leader of the Progressive Party in the House of Commons, attacked the Beauharnois Canal and Power Project, Premier R. B. Bennett (centre), announced a Parliamentary probe of the great private-ownership power project on the St. Lawrence. Senator Wilfrid Laurier McDougal (right), replied to the assertions of Hon. Robert Gardiner and upheld the Beauharnois Power Company.

Stony Plain and District

The regular Wednesday half holiday in the Town of Stony Plain has commenced and will continue thru June, July and Augnst, when all places of business close at one p.m.

Cherries, lemons, bananas at less than City prices, now on sale at Larson's Royal Cafe.

Mrs C H Reppert left last week on a visit with friends at Fort Wayne, Indiana.

Donald MacLeod. M.L.A. for Stony Plain, will shortly commence a series of meetings thrnout the Constituency.

Karl the Barber has moved from the pool hall to one door south, the shop recently vacated by Barber Goebel.

The secretary of the Leduc basketball club has sent an invitation to the Stony Plain basketball team to participate in the sports at Leduc July 1st.

There was a good attendance at the Union church on Sunday evening, when Rev C H Reppert held service, in the absence of the pastor.

Give a courteous reception to the census enumerator this week. Give all the facts and no fiction, says an exchange. Everything is confidential, so don't hide anything.

The S. A. band enlivened proceedings on Main street Saturday evening by giving musical selections.

Walther League News.

The annual election of officers of the local Walther League was held at St Matthew school last week, with the following result:

Pres., Phil Enders.
V. Pres., W Rosnau
Sec., Anna Miller
Treas., Bertha Wudel
Librarian, L Oppertshauser

The committee will be appointed by the executive at their next meeting.

COMING: Walther League summer camp at Edmonton beach July 7—13. A. B. C district summer convention at Edmonton Beach, July 10 & 11.

WHY SUFFER FROM HEADACHES,

Pain in and around the Eyes?

The right glasses fitted to your eyes will surely relieve you and give you comfort.

Glasses furnished Free.

Fifteen dollars examination fee.

That is far cheaper than paying $3 to $10 for an examination and then glasses at $12 to $15; but you cannot see the logic of this; you need more than glasses.

Spruce Grove News.

Winterburn Boy Scouts are to play baseball with Grove Scouts here, on Saturday.

An exhibition ball game will be played here next Sunday between the local team and a team from Morinville.

The Grove's Intermediates found the Stony Redbird ball players to be easy pickings, in the ball game on the Grove's diamond, Friday night. The score for the Grove boys was up in the 'teens. Battery—C Loeblich p, J Miller c.

Another Intermediate ball game was played here Sunday when the Winterburns engaged the local team. A record crowd was present, and witnessed a good game, Edmonton being well represented. Score, Winterburn 9 runs, Grove 7. Battery: C. and H. Loeblich p, W Box c.

Mr and Mrs Forbes spent the week end, camping at Lake Isle.

Mr Joe D. Miller returned home on Monday from Royal Alex. hospital, where he had been receiving treatment.

Mr and Mrs Michael Buws return from their honeymeon today, and will take up their residence in their new home on 2d ave.

The pupils at the local school celebrated the King's Birthday by pntting in a full day at their studies.

Capt Gibson is taking the Federal census in this district, replacing Mr J Brox. Rural enumerators are given unti the end of the month to complete their returns.

The dance at Winterburn hall last evening, celebrating the King's Birthday, was well attended.

A delegation of Old Timers from this district, headed by Mr D Brox, attended church service for Alberta Pioneers at the R. C. Cathedral, Edmonton, Sunday evening. His Grace Archbishop O'Leary gave a short address, and the sermon was delivered by Rev Ketchen, formerly in charge of St Joseph's church, Spruce Grove.

The Councillors of Spruce Grove M.D. met in Municipal Hall on Monday. Considerable time was taken up with discussions on road work and the proposed incorporation of the village.

Dissatisfaction at the treatment received has been expressed by the youths of this district who had made entries in the bird house competition held at the Beach on the holiday. The non prize winning owners of the bird houses which had been retained by the judging committee think they should have received compensation.

Now that seeding is practically at an end, a survey of this and nearby districts show that, with a few exceptions, farmers have eliminated the use of power machinery; the average farmer being content to get along as well as possible under the old system of horses power.

The Census of Canada 1931

In the opening weeks of June every family and every home in Canada will be visited by a representative of the Government for the great national purpose of taking the seventh census of Canada.

The census is really a stocktaking. That is, it provides the information to enable the Government and others interested in the development of the country to formulate progressive policies for the happiness, comfort and prosperity of our people.

All the information supplied is strictly confidential, and the officers of the Government are subject to severe penalty if they disclose any of the information which is given to them by residents in the country, to any other than the Government.

Furthermore, it has nothing whatever to do with taxation, or military service, or compulsory school attendance, or immigration, or any such matter; and the government itself cannot use it except for statistical totals.

The Government representative will put the same questions to all, and it is your duty as a resident of this country to answer promptly and truthfully. The Government is very anxious to avoid forcing anyone to answer these questions, but it is empowered to do so in the few cases where individuals may refuse.

CHAPTER XIX.

During the next week Nick had no time for introspection. The days were crowded with the winding up of his business—the mailing of his report and certain important papers—a letter to John Maxwell, accepting his generous offer to "take more time," and a long and loving explanation to Gay, telling the whole story, and how his decision to come back to her at once had been changed by this unexpected, almost incredible good fortune. He wrote:

Just imagine, dear girl, cruising around these tropic waters in a private yacht! Of course you'd tell me to go! If I weren't so sure of that I wouldn't consider it for a minute. I gather from your last letter that everything's all right at home; and though I'll admit that at night I get homesick, and wish I'd stuck to my first plan, still, I think if I did we'd regret it, both you and I.

So I'm going. It will mean only a month dear. They're to drop me where I can get a boat—probably some point in Cuba. Anyhow, send a letter to Havana. And of course I'll write if I get a chance to mail anything, though that's unlikely. However, I understand that the yacht's equipped with wireless, which makes me feel nearer home. Can't you hold back the apple blossoms till I come? I don't want to miss 'em!

This was but a small part of that letter. Knowing Gay's feeling about Angela, Nick explained her part in the invitation with almost too much caution. He laid great stress on the kindness that had made her take the journey to Kingston for the sole purpose of giving him this chance. He said, as he had said so often in the past, that he felt sure Gay was unjust to her, and that she was an unhappy woman. If he could help her to forget things for a while, it might repay her a little for her thoughtfulness in asking him to go.

On the day this letter reached Bakersville, Gay was not well. She was resting in her bedroom when Sonny brought in the mail, which consisted of her letter, and the usual postcards for the little boys. Gay read them aloud to Sonny, and as he descended to share them with Uncle Sim, she turned to her own letter with a sense of overwhelming gladness. It would doubtless tell when Nick was coming. His last note had hinted that the work was reaching completion, and that she could look for him before many weeks.

Gay had missed her husband more than she would let herself admit. If, as Nick said, he felt when away from her like a man minus an arm or leg, Gay herself felt a sense of oppression, as if the very heart in her breast was incomplete with Nick so far away. And for the last few days a weakness she did not understand had come upon her. It frightened her. Was she perhaps, to go through all she had suffered for little Nick, again? She would not let herself face the thought. There was no reason to think that the same experience would be hers twice. The doctor had reassured her firmly. When Nick came home everything would be all right again; and if the baby were the little girl he wanted (and deep in her heart Gay knew it must be that little girl), how gallantly she could endure the suffering! It was the courage Nick always gave her that she missed now. She couldn't stand having him away much longer.

Gay read her letter.

An hour later, wondering at her long silence, Uncle Sim went quietly upstairs. Gay had said nothing about not feeling well, but the old man had detected an unaccustomed listlessness in her manner, and understood that things were not quite right. Fearful of waking her should she be asleep, he stood for a moment on the threshold. Then, at a sudden convulsive movement of her shoulders, he crossed the room and touched her gently. She turned, and with consternation he saw the tears.

"What's the trouble, dearie?"

She sat up, wiping her eyes; trying to smile; ashamed that he should find her weeping.

"I'm just a—silly. All along I've urged Nick not to hurry, but—but somehow I thought he would. That's like a woman, isn't it, Uncle Sim?"

"I don't just rightly get it," said patient Simeon. "Isn't Nick comin' pretty quick?"

"He—he was." She swallowed a sob, and went on quietly: "He'd made up his mind to start as soon as his business with that stupid lawyer was finished, and then—you—you know, Uncle Sim, that Mrs. Halliday was on the boat going down?"

Simeon nodded. Daylight was breaking through, and his jaw settled into a straight, unyielding line. Gay, twisting her wet handkerchief into a ball, did not notice.

"It seems," she continued slowly, "that some friends of Mrs. Halliday's—some people who visited here last summer, have asked Nick to go on a cruise in their yacht. Mrs. Halliday went clear to Kingston to give the invitation. It—it was very kind of her, of course, and it's a wonderful chance for Nick. I suppose I'm selfish even to feel disappointed. He says it's for only a month longer, and they're to go into out-of-the-way places, and see marvelous things. It's ridiculous of me to cry, but—but I'd made up my mind he was coming, and——"

"There! There!" Simeon comforted. "A month'll slip by in no time now the warm weather's come, and they's so much pretty to look at. When does he sail? Look-a-here Gay! If you feel like you couldn't spare him I'll send a message. Nick wouldn't want to go if he knew you needed him."

For a perceptible moment her eyes brightened; then she said: "No, it's too late; and anyway I wouldn't be so selfish as to spoil his plans. They must have sailed yesterday or the day before, and there's no way to reach them. He doesn't even mention the name of the yacht—probably didn't know when he wrote. Don't worry about it, Uncle Sim. I wouldn't have cried if I'd been well."

She hadn't meant to confess even as much as that, but Simeon said anxiously: "What's the matter, dearie? Have you seen the doctor?"

"No; but I will. I shan't economize on doctors now, Uncle Sim—not after what I went through before."

Simeon walked to the window — looked out at the children, and called: "Sonny, you let little Marthy be. Don't you know she's a lady and you got to be polite? That's it. Now, Marthy, you give that spoon to the baby. He's littler'n you, and you got to learn to give up yer own way. There comes your daddy. You ask him if Uncle Sim ain't right."

Gay had joined him, and was watching Halliday bend down to settle the small dispute. Simeon put an arm about her.

"Look-a-here," he said, "how's Nick to get back if they're cruisin' off in them out-o'-the-way places?"

"They'll drop him somewhere — some part of Cuba, probably. Perhaps he'll write more definitely before they start. You can read the letter, Uncle Sim. It's a daring letter, and of course I understand; only—only, Uncle Sim, I—I don't like Mrs. Halliday."

"M—m," grunted Simeon; then: "Nick'll find her out, honey. Nothin' like boat travel to show up people's failin's."

"But Nick's so—trusting. He thinks everyone's as splendid as he is himself. And she's clever, and older than he, for all she looks so girlish. I shouldn't want her to make a fool of him."

"Don't you trust him, Gay?"

She flushed hotly.

"Of course I trust him! I don't trust her, that's the trouble. Oh, I'm not jealous. I'm not. I'd trust my husband on a desert island with the prettiest woman in the world; but I have a feeling that Mrs. Halliday has some reason for her interest in Nick. Why should she have taken that journey to invite him, when she could have written? Don't you see? She knew the influence of her personality. She knew it would count. It's what she wants of Nick that troubles me—not what he may want of her."

"She wants his scalp most likely," mused Simeon wisely, "but if I know Nick she'll have some little trouble pryin' it loose. Now you go wash yer face, dearie, and come down to dinner. That hired girl Julie Nipps found for us is some cook. I think maybe I'll take over the housekeepin' from now on, so you won't know what you're goin' to set down to. Maybe some surpises'll give you more relish for your victuals. My old woman used to say she got sick to death o' knowin' what was comin' on the table, even if she didn't cook it herself."

Gay pressed her cheek lovingly against the old man's arm.

(To Be Continued.)

PILES
PAIN STOPS LIKE A FLASH!
"I had piles for months. Nothing helped me until I tried 'Soothe-Salve'. The first application ended itch and pain. Piles gone." — E. C. Arley. End pain quick. All druggists.

A Unique Industry

Town Of Norway, Maine, Has Large Snowshoe Plant

Snowshoes and skis may be out of season, but not in the small town of Norway, Maine, on the Norway branch of the Grand Trunk Railway, branch of the Canadian National Railways.

One of its largest industries is the manufacturing of snowshoes and skis and it boasts the largest ski and snowshoe factory in the new world. Improved machinery now being installed will greatly increase the present annual output of 10,000 pairs of snowshoes and 60,000 pairs of skis.

Each year the hides of 3,000 steers are cut up for snowshoes filling or strings, and 200,000 feet of white ash are used for the frames. Snowshoes varying in size from a child's model measuring 9 inches by 32 inches to a 6-foot Peary model are made in Norway as well as skis from 3 to 9 feet in length.

Mellie Dunham, of fiddling fame, who lives in Norway, designed and made the snowshoes used by Rear Admiral Robert E. Peary on his successful dash to the North Pole.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

Cattle Shipments To Britain

Livestock Shipments In 1930 From August To End Of Season Reached 3,581 Head

Following the revival last summer, after an absence of some years, of Canadian live cattle shipments to the British market, 3,581 cattle reached the port of Manchester from the Dominion between the initial shipment made in August and the end of 1930, writes Harry A. Scott, Canadian Trade Commissioner, at Liverpool, in the Commercial Intelligence Journal.

MINARD'S
"KING OF PAIN"
LINIMENT

Number Of People Afraid Of Lightning

And Still Will Risk Their Lives In Many Ways

It is surprising to find the number of people who are terrified of lightning, in spite of the fact that the records go to prove that very few persons have ever been struck by lightning.

As a matter of fact there is no reason for terror, but when nature starts her fireworks it is useless to point this out to many people.

It really is surprising. There are men—we are not talking about women—who will shiver at a flash of lightning, even rush for cover.

Yet these same men are not afraid to try and beat a train over a level crossing, or not afraid to cut in and out of traffic on a crowded highway, even if they have the family with them in the car.

And there are men who think nothing of trying to pass a car on the face of a hill, or of driving at a rate of sixty and seventy miles an hour, who will not drive at all in a thunder storm, because they are afraid of lightning.

There are men who are afraid of lightning, who are not afraid to rock a boat; to lie, to steal, even to be high pressure salesmen. The list, in fact, is long, if not endless.

True, lightning has proved fatal, but even if it chose all its victims from the class of birds we have mentioned, scarcely a gap would be made in the ranks, we would still have them with us, a pest on the land.

Effective Fog Horn

Toronto Professors Working On An Entirely New Type

The most effective fog-horn in the world was perfected by John Northey of Toronto, and is now being used by many foreign countries, Prof. Louis V. King, of McGill University, told the physics section of the Royal Society of Canada recently.

Prof. King and Prof. C. U. Vessot are now working on an entirely new type of fog-horn, it was announced. This horn would enable a ship to determine its exact distance from the danger point. Simultaneous warnings would be sent out by sound and by radio, and picked up by a delicate mechanism on shipboard. Using the difference in time between the arrival of the sound warning and the arrival of the radio warning the ship's crew would then be able to calculate the distance over which the message had come.

Soviets Make Rubber By Secret Process

Cost Of Manufacture Said To Be Very Low

The Leningrad rubber trust factory produced more than a half metric ton (more than 1,100 pounds) of commercial rubber from oil in one day by means of an unrevealed process.

The work was done under direction of a Professor Byzou, crowning experiments begun in 1918, the announcement said. It was reported the production cost was extremely low and that the new process accordingly presents tremendous commercial possibilities.

Rubber goods are being manufactured from this batch at the "Red Triangle" factory in Moscow.

Douglas' Egyptian Liniment relieves toothache and neuralgia. Invaluable in cases of croup, sore throat and quinsy. Keep a bottle handy.

Adds Value To Home

Shrubbery Which Is Carefully Planted Is Real Asset

Carefully planted shrubbery adds charm and value to the home. Authorities agree that best effects are secured by confining the shrubs to the border and to the base of the dwelling, leaving an open lawn. In foundation planting shrubs of different heights should be chosen and the planting arranged irregularly and so placed as to conceal the alignment without completely covering the foundation.

Suitable shrubs are described by the Dominion horticulturist in the federal department of agriculture bulletin No. 89, which also tells how to go about the planting.

April Fools day originated with the Hindus, who celebrated it on March 31, but the Romans' Feast of the Fools was held on February 17.

There Should Be No Ugly Women!

There are 2 classes of women.

(1) The beautiful, healthy and attractive creatures.

(2) Those pitiful ones who don't know how to make themselves beautiful—rather those who don't know the vital importance of Kruschen Salts to physical perfection and attraction!

Kruschen Salts are a perfect blend of the six vital minerals which Nature ordained, glands, blood, nerves and body organs should daily receive from food if they're to function correctly—and which are impossible to obtain in this age of modern cooking.

Get a bottle of Kruschen—and before the bottle is half empty your complexion should be gloriously smooth and clear. Kruschen clears blood of harmful acids and poisonous waste matter which cause blemishes, blackheads and pimples. Your wonderful new energy will surprise you—mind feels so keen and alert—no more washed-out feeling getting up in the mornings.

Little Helps For This Week

"Therefore if any man be in Christ, he is a new creature; old things are passed away; behold, all things are become new."—2 Corinthians v. 17.

Whatever hath been written shall remain,
Nor be erased, nor written o'er again;
The unwritten only still belongs to thee,
Take heed and ponder well what that should be.

—Henry Wadsworth Longfellow.

We cannot undo the past and begin afresh. We have to take the past as the starting point and determining element of the future. But the gospel reminds us that what cannot be obliterated may be transmuted by divine grace. In Christ Jesus we may become new creatures; and in the eternal life that we begin in union with Him all old things, so far as there is any condemning power in them, pass away, and all things in the transfiguring light of heavenly love become new.—Hugh McMillan.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Eclectric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Turkish City Dwindling

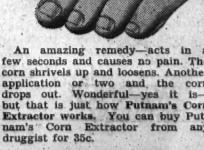
Constantinople Is Rapidly Losing Place As World City

Constantinople, once the proud capital of the sultans, is gradually dwindling into insignificance as a world city. In 1924 a rough census of Istanbul, as Turks call the city, showed a population of 1,065,000, of which about 656,000 were Moslems, 297,000 Greeks, 73,000 Armenians and 12,000 Jews. Three years later a more accurate census was taken and the city had then a population of only 673,000. Recently the municipal electoral committee, while taking a census in preparation for the elections, found that the population of Istabul has slipped downward 119,000 since 1927. Evidences of commercial stagnation are apparent on every hand.

War Relics Found In Park

Workman unearthed a number of World War relics in Kelvingrove Park, Glasgow, Scotland, recently. Among them were two hand grenades and four live eighteen-pound shells. It is believed they were stolen from a munitions factory during the war and hidden in the park.

CORNS
LIFT OFF—
Pain Stops!



An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

PUTNAM'S

Lovely Skin

Vegetable Pills Did What Creams Couldn't

"I find (writes Miss E. T. Clapham) that Carter's Little Liver Pills will do more to keep the complexion clear and the skin free from blemishes than all the face creams I have used."

Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGETABLE and have a definite, valuable tonic action upon the liver. They end Constipation, Indigestion, Biliousness, Headaches, Acidity. All druggists. 25c and 75c red packages.

News of the Golf Links

Stony's new municipal golf course is now the busy place thru the day and each evening. The former unemployed are now getting in some good work as caddies to the gentry.

Some 50 members are now enrolled. This has proven to be such a large number for a six-hole course that it is probable a waiting room will be constructed for those awaiting their turn on the links,

Jack MacLilacs, the veteran player, is up at the links every morning, practising up his game. Saturday morning he came within two of the course's record, made by Mr Barth.

The other afternoon, Clarence, who had a good lead over his opponent, had an accident near the last cup Clarence now says "one thing only is certain in golf—a match is never over until the last putt is holed."

On Playing Golf.

(BY I M F.)

We were all asittin' in the nice, cool refreshment booth the other evening, after a round of the course, when a discussion arose over the happenings a golfer runs into, in the course of a season, when the oldtimer remarked.

"There is nane ither game in the wide, wide wur r-rld in which sae mony weird and uncanny incidente can occur as in goff, where ten acres of rolly land and a wee bit brush gie ample scope for the display of the astonishing upsetting of a player's regular form This applies not only to the guid ones, but also to the scores of amateurs who often achieve results awa beyond the dreams of the professional star. Dinna ye doot it, hunnerds of these rapscallions hae scored holes in one stroke

"Flying golf balls have killed robins, rabbits, roosters, gophers, goshawks, and 75-watt bulbs. They have gone down chimneys, lodged in trees, popped into open bottles and cans and old shoes, disappeared in hip pockets and stuck in mules' ears. These balls have taken unbelievable journeys into unbelievable places. Every round of golf is an adventure into the unknown. I weel remember one morn, on the"——

At this stage an old jitney rattled up and the driver, in a raucous voice, inquired: "Any o' yuse guys agoin' down town?" As the last man got aboard the jitney he waved his hand at the speaker and said: "Good-bye, Jim!"

Touring British Columbia.

Tourists from the other provinces to B. C. are allowed 6 months' touring privileges on their home license plates, and are required to register their car 24 hours after entering B C. Tourists wishing to stay longer than 6 months must secure B C license plates and pay the $10 registration fee.

For Chicken Fanciers.

An illustrated circular on poultry diseases has just been completed by Miss H Milne, lecturer on poultry at the U of A. This is available for distribution thru the Dept. of Extension of the University. This circular discusses methods of diagnosis, prevention, and treatment of the more common diseases and parasites of poultry, and also gives general recommendations for building up the health and general efficiency of the flock

Sporting Notes

The Editor has received a number of congratulations from a number of players on last week's golf edition. We expect to shortly print another good article entitled 'Levinsky on the Goluf Links.'

Sunday next sees the last scheduled game played, in Basketball League; with the possibility that some of the postponed games will be run off later on.

Stony's three ball teams played Friday, when Walther League and the Intermediates both lost; but the almost forgotten Seniors went down to Fort Sask'n and won their game.

Lucknow baseballers played a return game with Stony Schoolboys on local grounds last Saturday, and lost to the local boys 11 to 7 runs. Stony battery: Art Davis p, Eddie Mayer c.

A ball game between Stony and a team from Rosenthal took place on local grounds Monday night. Stony 17 runs, Rosenthal 8.

The new manager of Stony Plain Senior baseball team has been successful in arranging a series of exhibition games for his outfit with other first class teams.

Church Services.

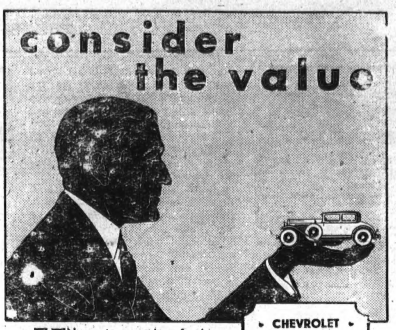
The lowest or any tender not necessarily accepted.

T. WUDEL.
Sec. treas. S.D. 2887.



AN outgrowth of the McLaughlin Carriage Company, General Motors of Canada, Limited, traces its history to 1869, sixty-two years ago. Since that time it has put forth continuous effort to give outstanding value to its customers. Manufacturing on Canadian soil has been constantly improved and refined. Large purchases of raw and finished materials, made in Canada whenever possible, have reduced prices and increased quality. The outstanding character of General Motors Products has attracted a splendid body of dealers who are ready to demonstrate and explain, at your convenience, this extra value.

Look in the classified pages of your phone book under "General Motors" for the address of the nearest dealer.
